EDUCATION

University of Silicon Valley

Bachelor of Science, Computer Science (President's and Dean's list, multiple semesters)

Apr 2025

San Jose, CA

SKILLS

Python | C/C++ | Java | C# | JavaScript | Bash | SQL | HTML | CSS | Angular | WordPress | Linux | Docker | Virtualization | GitHub | Perforce | Unity | Unreal | Agile | Network Protocols

PROJECTS

Avoreon - Facebook Messenger Desktop Application

- Built a desktop client for Facebook Messenger using Electron, Javascript, HTML, and CSS after Facebook discontinued their official desktop app
- Implemented many features such as native notifications, unread message indicator, taskbar and system tray integration, keyboard shortcuts, and custom UI modifications.

System Overload

- Developed an interactive browser-based application using JavaScript, HTML, and CSS for the Hatsune Miku Magical Mirai Programming Contest.
- Integrated the TextAlive API to synchronize lyrics, animations, and visual effects with music playback in real time.
- Designed a Windows-inspired desktop interface featuring dynamic corruption effects, interactive UI elements, fake system dialogs, animated desktop icons, and multiple endings based on user interaction.

WORK EXPERIENCE

CodeAdvantage / Instructor

Aug 2025 - Current

- Taught coding fundamentals to students in grades K–3 using Scratch, Python, Lego Robotics, and Minecraft Code.
- Adapted lesson plans to different learning styles and skill levels and provided one on one support to troubleshoot errors.
- Designed and guided students through hands-on projects, both solo and group projects.

Obscurity / Project Manager

Jan 2025 - Apr 2025

- Simultaneously led two teams, using agile methodology for different projects.
- Obscurity: Oversaw development while contributing as both lead engineer and project manager. Worked on Game Design Document (GDD), reviewed code, managing the GitHub Repo, and assisted with the development side.

Pixel Poxet / Engineer

Jan 2025 – Apr 2025

- Worked on the inventory system and pop up boxes in Unreal Engine 5.
- Communicated regularly with other engineers to ensure a smooth development progress.

USV GPT / Engineer

Aug 2024 – Dec 2024

- Collaborated with a team to design and develop an AI powered document ingestion system using Ollama 3.1.
- Independently designed and implemented the UI, ensuring it aligned with the organization's branding.

ABP Solutions / Intern

Aug 2024 – Dec 2024

- Managed website content updates, created new pages and sections.
- Rebranded sections of the website, transitioning from HRO to HCM and BPO.

Six Industries / Intern

Apr 2024 - Aug 2024

- Worked with a team to convert the old source code to Angular 17 components.
- Redesigned X-Proctor login screen to have a more modern UI and improve user experience.
- Contributed to a government-use program utilized by the DoD, with the task sourced through Six Industries.

KMVT 15 Silicon Valley Ed News / News Host

Jan 2014 – Jan 2015

- Conducted interviews with people who accomplished something.
- Developed strong interviewing and communication skills.
